HIGH-DENSITY BALER

K 838

FORTSCHRITT AGRITECH

www.fortschritt.cn

ESSENTIALS AT A GLANCE

- processes silage easily with a bale weight up to 50 kg
- silage transport directly to trailer
- low maintenance
- optional connection for trailer
- easy rope/wire adjusting
- Raussendorf – high performance knotters
- straight loading chute + hitch
- automatic-overload-protection (protection of PTO, feeder and baler)
- bale counter

INNOVATION-& DESIGN-AWARD
OF THE FREE STATE SAXONY 2009
FOR TECHNIQUE & DEVELOPEMENT

TECHNICAL DETAILS

- Bale chamber: 360 x 400 mm
- Bale length: 400 - 1200 mm (infinitely adjustable)
- Baler weight: 1650 kg
- Pick-Up working width: 1800 mm
- PTO speed: 540 upm
- Tractor capacity: 35 HP
- Hitch: field rail
- Tires: 10/75-15.3 (2x)

STANDART EQUIPMENT

- Twine tying with 2 knots
- Drive with automatic overload protection
- Hydraulic pick-up with supporting wheel
- Drawbar eye Ø 40 mm or attachments clutch for drawbar
- Depositing plate for bales
- Wide angle PTO shaft

Strong, agile, powerful. The smaller model of our high-density baler, the K838, has been on the market since 2016. Due to its slim design, the K838 can also be used optimally on small, angled surfaces. One of the selling points of the K838 is its low maintenance. The harvested and pressed material can be transported directly to the trailer. The rope/wire can be adjusted easily. The machine is driven with an automatic-overload-protection. Field testing showed that the K838 is able to process green grass, hay, wheat, corn-straw, herbs and even rice-straw. Detailed result-reports are available.

We strive to meet all requests as quickly as possible.

"Our vision is to be a leader in China's agricultural machinery market, founded on decades of engineering expertise and a strong dedication to German quality standards. We shall always pursue the best and most efficient solutions for our customers. Although our brand can look back on a great history, shaping the world of agricultural machinery, we believe tradition only makes sense, if one is willing to achieve even higher aims."
